Dear Judge Kotelly,

I have been informed that you have the responsibility of reviewing the Microsoft antitrust case. I wanted to take a second of your time to express my opinion on this matter. As many know, the Microsoft Corporation has been trying to corner the computer market for nearly a decade. This latest move in attempting to get what is essentially a governmental exemption from antitrust laws. Please do all you can to stop this abuse of our justice system and to help us retain our free market system. Competition is vital to our survival as a nation. Please don't let Microsoft have their way with us and our government. Thank you for your time.

Sincerely,
Adam S. Hammill
